## Domain, Email and Mailing List Services

### DOMAIN SERVICES

*NetAccess provides registration and DNS services for more than 500 domains. We look after administrative and technical issues related to your domain including rewards.*

### BASIC EMAIL

*More than 4,000 clients trust NetAccess to handle their IMAP and POP3 email. We provide fast reliable and secure email service.*

### LIST MANAGEMENT

*LISTSERV is the original opt-in mailing list solution that customers have trusted for more than 20 years. Use your email list for newsletters, announcements, discussion groups and communicating.*

*For more information on NetAccess products and services, contact a NetAccess representative at 905-524-2001 or sales@nas.net*

### NetHost Services

NetAccess can take care of all your hosting needs and eliminate the worry and headaches of managing your own servers. Our servers use the latest industry standard BladeCenter architecture to provide fast, secure, highly functional operation with maximum availability.

NetAccess offers domain registration and renewal services as well as both basic (IMAP and POP3) email and corporate (Microsoft Exchange and BlackBerry/ActiveSync) email services. NetAccess provides the world's leading email list management program, LISTSERV, to manage your mailing lists.

### Domain Services

NetAccess also offers domain registration and renewal services. The registration of various domains such as; .com, .ca, .net, .org, .info and .biz are available. NetAccess will ensure your domain is correctly registered to you and that you are notified well in advance of renewals. DNS (Domain Name Services) ensure your website is always available to your clients. Regardless of your company size, you can have the same appearance on the Internet as a large multinational organization.

### Basic Email

Promote your organization with every message you send, when you create an email address that uses your domain. Basic email lets you appear professional and much larger company. Email accounts are included with NetAccess hosting packages. You can have up to 20 email accounts with the Business Hosting or 40 accounts with Corporate Hosting. You simply use any email client (Outlook, Outlook Express, Eudora, Thunderbird, etc.) to send and receive emails.

- NetAccess provides IMAP and POP3 email services to over 4,000 people.
- Ability to use your domain name in your email address (e.g. joe@mycompany.com).
- Spam and Virus protection so you get the messages you really want.
- Reliable email hosting servers so your email is available when you need it.
- Web access to email from any location with an Internet connection.

### List Management

LISTSERV launched the email list management industry in 1986 and remains the gold standard today. It provides the power and reliability you need to manage your opt-in email lists, such as email newsletters, announcement lists, discussion groups and communities.

### Why LISTSERV?

#### User-Friendly

LISTSERV's Web interface simplifies email list and server management, allowing you to control your lists and administer your server from anywhere on the Internet.

#### Reliable

LISTSERV was the first email list management software developed. With more than 20 years under its belt, LISTSERV is the most time tested and reliable email list software on the market.

#### Flexible

LISTSERV allows for highly customized setups to suit your exact needs. The Web interface can be fully customized to seamlessly blend with an existing Website or corporate look.

#### Scalable

Thanks to LISTSERV's speed and power, expensive hardware is not required. LISTSERV excels even in modest environments and allows for plenty of room for growth.

#### Secure

LISTSERV is the only software of its kind with built-in virus protection. The system scans all messages for viruses before delivery. In addition, the password protected interface is sure to keep your site secure.
