

Internet and Communications SOLUTIONS for Business

Solutions that are geared to meet client's needs in a competitive and rapidly changing technological environment. Our suite of services are designed to put clients in control of their data and voice requirements so they can concentrate on growing their business

The NetAccess Advantage

Since 1993

Internet Solutions for Business

Connectivity

High Speed Internet Solutions - Designed to fit your needs

Fibre, ADSL, and our high speed wireless network deliver fast, high quality and reliable connections from 6Mbps to 300Mbps. Symmetrical services available. VLANs allow private connections to multiple locations. Connections are managed for optimal performance.

Hosted Services

Hosted Microsoft Exchange with Mobile Sync

Increase productivity by sharing calendars, tasks, and contacts throughout your organization. Collaboration saves time and money. Extend this service to mobile devices with no additional monthly costs. Service includes email filtering, encryption, and protection from spam and malware.

Website Hosting - Leading Local Hosting Environment

Websites drive your business. Offering the latest CGI, PHP, ASP, and MySQL database capabilities for developing websites. Includes domain name services, web statistics, email accounts, and FTP sites.

Colocation and Cloud Computing

Reduce your capital expenses for computer servers and reduce maintenance and support. Connect to your data from anywhere. Your server is running in our Data Centre on a fully secure, redundant and always backed up computing platform. Full scalability allows you to expand processor memory and data storage as your needs change. Our local presence means we are always there to serve you better.

Digital Phones

Driving Performance and Reducing Cost

Integrate multiple locations, home offices, and road warriors. Share receptionists across offices. Manage costs and activities with standard reports. Improve customer service with easy call queuing and reporting. Our private network, end-to-end delivers a crystal clear sound with great reliability.

Security

IP Video Solutions

Leverage your IP network and internet connection with IP video surveillance cameras. Protection of persons and property. Monitor your business for productivity and marketing opportunities. Integration with other devices including notification and alerts on computers and mobile devices.

NetBackup and NetShield

Designed to help clients protect their critical business resources. NetBackup has a client controlled interface which can backup critical files from computers, laptops, and servers. Encrypted and secure data is kept safe in our Data Centre and can be retrieved by the client anywhere and anytime. NetShield protects email files from spam, viruses and unauthorized access.

NetPro Services

Offering end-to-end solutions that fit the needs of our customers. From application development to managed services, our in-house team and partners have a wide range of expertise focused on ensuring that your technology is managed in a reliable and secure manner, and delivers top performance. Our mission is to help you leverage your current technology and emerging technologies in a cost-effective manner. Let our NetPro Services team help you reach your goals.

Locally Owned National Reach

NetAccess Systems Inc. is one of Canada's first Internet Service Providers, and has been a leader in providing Internet and communications services to the business community since 1993.

Top Tier Facilities Private Infrastructure

NetAccess is an authorized Motorola and Bell partner for broadband services and has built its own infrastructure in its core service areas. With the expansion of its facilities to Canada's main data and telecommunications hub at 151 Front Street in Toronto, and expansion of its corporate office and core infrastructure to the CIBC Commerce Place top tier facility at 21 King St. W., Hamilton. NetAccess is positioned to provide a full integration of data and voice services across Canada.

Collaborative Approach Delivers the Right Solution

NetAccess provides comprehensive consulting and network integration through strategic partnerships with a select group of area companies and independent consultants. Clients do not have to worry about keeping up with technology. We do it for them.
